

Welcome to the BVCP Open House – August 29, 2016. The Purpose is to:

1. Provide a **preview of information** about the plan process and upcoming events in the fall. (see list of events below)
2. Share **drafts of the policy sections** that reflect edits to plan chapters to align with approved master plans and programs at the city and county.
3. Share preliminary information about **land use options and policies** that are being further developed and analyzed for community discussion in the next few months.

The BVCP plan update is a several year effort that has been going on for over a year involving many events and points of engagement. It will continue through early 2017 when the draft plan will be completed.

Please fill out a comment form tonight or check the project webpage: bouldervalleycompplan.net and send comments to: bvcpchanges@bouldercolorado.gov

Up-Coming Events

Local Area Meetings in October – dates and locations to be finalized soon! These will feature land use scenarios and policy choices with complete analysis and offer opportunities for discussions about preferences and trade-offs.

- Central Boulder
- North Boulder/ Palo Park
- South and Southeast Boulder
- Gunbarrel

An online survey on policy choices will be available Mid-October to Mid-November

Meetings with Groups and Organizations September – November

If your group would like to have a planning staff member attend your meeting to provide information and have a discussion about the options and analysis for consideration in the update, please let us know and we can work with you to plan to come to your meeting.

As more information and analysis on policy and land use options for consideration becomes available, it will be shared on the project website at www.bouldervalleycompplan.net and can be found under the “FOCUS AREAS: LAND USE SCENARIOS & POLICY OPTIONS” tab. Feel free to provide input by e-mail to bvcpchanges@bouldercolorado.gov or call with questions at 303-441-4907.

The dates and locations listed above are anticipated but please confirm these on the project website for final information.
